

NEW

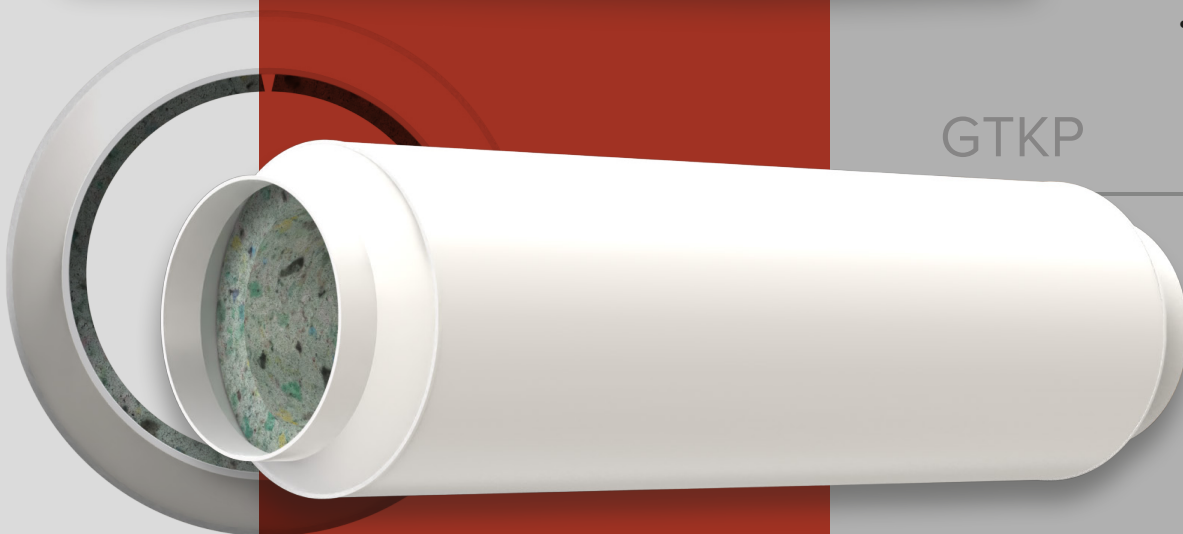

Rectangular and round silencers for SPK

GTPP, GTKP

GTPP

GTKP

GTP silencers are specially designed for integration into the plastic duct system

- **They effectively reduce system noise** caused by fan operation and airflow, and prevent sound from propagating through air ducts from adjacent noisy areas
- **The housing is equipped with a sound-absorbing insert** that reduces (or completely dampens) the energy of sound waves

Low noise
level

For supply and
exhaust systems

SILENCERS FOR SPK

NEW

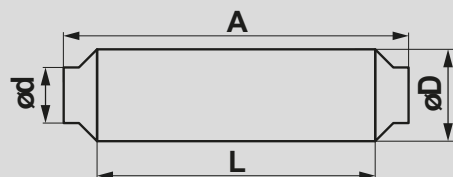

Rectangular and round silencers for SPK

GTPP, GTKP

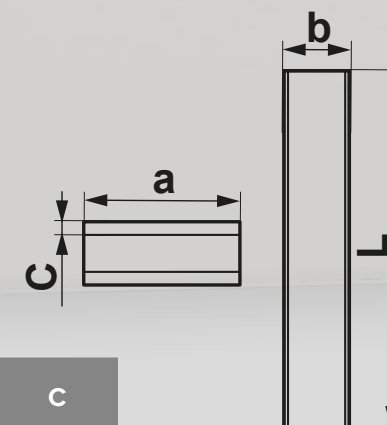

Overall dimensions:

Item code	d	D	A	L
10GTKP	100	128	584	500
12,5GTKP	125	159	584	500

Overall dimensions:

Item code	a	b	L	C
620GTPP	204	60	500	10
922GTPP	220	90	500	20

GTPP

NEW

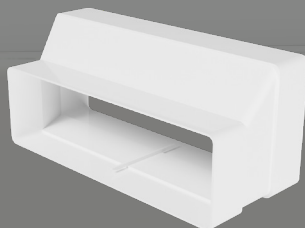

Rectangular and round silencers for SPK

GTPP, GTKP

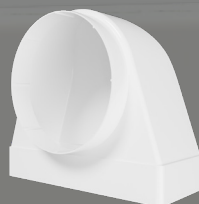

For optimal system operation, it is recommended to connect a rectangular silencer with a larger cross-section than that of the connected air ducts

So that you can implement any installation scheme, we offer a huge selection of ready-made adapters for any individual tasks
